4520

THE VENTRAC 4520 BUILT TO WORK

Through Ventrac's advanced engineering and design efforts, the best mix of machine performance, operator experience, and durability has come together in the new 4520 tractor. Ventrac has become a top choice for versatility for grounds care professionals. Combining the perfect blend of peak power and agility with front-mounted attachments for superior visibility.

QUICK CONNECT ATTACHMENTS

Out-front attachments provide better visibility, safety, and control

FLEXFRAME

Better Maneuverability, more stability and traction, & consistently low impact/ground pressure

WEIGHT TRANSFER

Unique to Ventrac - Shifts weight of attachment to tractor to increase stability and provide traction when needed most

ALL-WHEEL DRIVE

For superior traction in all situations

EFFORTLESS STEERING & CONTROLS

Intuitive controls help operators become one with the machine

LIGHT FOOTPRINT

Allows operation on soft ground with minimal impact

ALL SEASON PERFORMANCE

No matter the weather or job, this tractor is ready to get it done

LOW PROFILE DESIGN

For optimized stability and handling performance

MASTER OF ANY TERRAIN

FLEXFRAME

The majority of compact tractors have followed the structure of traditional agricultural tractors with a straight frame design. Unfortunately, this old-fashioned design was not for machines that needed to **adapt to uneven and wet terrain**. In contrast, the Ventrac 4520 is built with FlexFrame, allowing the tractor to articulate and oscillate. Ventrac's FlexFrame allows the machine to crawl over terrain no matter how it changes, allowing **more stability and capability** to work on surfaces that aren't perfectly flat.

POWERFUL FLEXIBILITY

- Smoother Ride for Operator
- Increased Stability on Slopes
- Lower Ground Pressure
- Matching Wheel Path
- Tighter Turning Radius
- Increased Traction

LIGHT FOOTPRINT

One of the most significant benefits of Ventrac's FlexFrame design is the machine's light footprint, which can be maximized with the addition of dual wheels. Even on the most delicate turf, its ability to operate in wet conditions makes its performance **unmatched by any other equipment**. Ventrac's all-wheel drive and flotation tires help the tractor move across the turf without creating ruts or damaging grass. In addition, the oscillating FlexFrame keeps all four tires in contact with the ground, spreading out the weight of the tractor and minimizing its impact on the turf.

GENTLE ON TURF

- Dual Wheels for Better Weight Distribution
- Minimized Impact on Turf
- Operate on Soft Ground Conditions

OPTIONAL SLOPE GAUGE

WEIGHT TRANSFER

FLOATING ATTACHMENT

DUAL WHEELS

LOW CENTER OF GRAVITY

FLEX FRAME

PERFORMANCE ENGINEERED TIRES

MOW EXTREME HILLS UP TO 30 DEGREES

30°

ADVANTAGE ON SLOPES

DESIGNED FOR SLOPES

Ventrac's slope capabilities will elevate your operational experience to the next level. With a unique blend of features that no other machine can offer, Ventrac provides **exceptional stability and control** on slopes.

Combining the FlexFrame design, all-wheel-drive, and dual wheels allows the tractor to hug the turf for better traction and stability on slopes up to 30 degrees.

- Full-Time Contact with the Ground
- Wide Stance for Exceptional Stability
- Mow Slopes up to 30 degrees

ELITE SIDEWALK SNOW REMOVAL

SIZED FOR SIDEWALKS

The snow removal industry can be competitive, and contractors must perform at the highest level to flourish. Ventrac's full line of snow and ice management equipment provides contractors with the edge they need to compete.

The FlexFrame design allows for **better maneuverability** in tight spaces plus has the added benefit of navigating curbs up to 8 inches.

Contractors save labor and time while performing more efficiently when multi-tasking with the 4520. Eliminate sidewalk shoveling and separate salt applications by combining an attachment on the front and a deicer on the back for a one-pass process, saving time and labor.

For every intensity of snow event, Ventrac has it covered with the ideal attachment. Brooms handle light snows with ease, snow blowers for heavy removal, and blades for everything in between. To enhance the operator's experience, staying warm and dry is achieved with the addition of a heated cab.

Ventrac's compact size and its one-pass process results in the **perfect match for tackling sidewalk snow.**

VERSATILITY IN MOWING

EXPAND MOWING CAPABILITIES

Ventrac's full arsenal of mower decks offers **every mowing option needed** for efficiency, quality of cut, and precision to maintain everything from wild brush to professional sports turf. Within this extensive line of mowers, each offers world-class performance and capabilities.

Features include single-lever height adjustments, full-length rear rollers, high-strength steel deck construction, and industrial components.

An optional hydraulic flip-up and mulch kit add convenience and versatility to this lineup.

VENTRAC STRIPES - SUBMITTED BY JAMES SUMNICK

45RC REMOTE CONTROLLED TRACTOR

WHERE INNOVATION MEETS UTILITY

The advanced 45RC platform is dual-operated, featuring both operator-on and remote control functionality, with precise electro-hydraulic controls. Built to excel in demanding work environments, the 45RC comes equipped with an industrial-grade remote and ergonomic joystick, making it the ideal choice for tasks that require durability.

Dual-operation modes in a remote control tractor like the Ventrac 45RC provide superior utility compared to a single dedicated remote unit. With the option to switch seamlessly between operator-on driving and remote control, operators can choose the best approach for various tasks, ensuring greater precision in tight, difficult, or hazardous areas. This flexibility allows for efficient handling of complex jobs that require human oversight or remote operation, optimizing both productivity and safety. Additionally, dual-operation allows the machine to be fully utilized in diverse settings, offering a broader range of applications than a dedicated remote-only system.

The new ergonomic joystick replaces the mechanical drive-link and adds new functionality and features while increasing operator comfort. Because this tractor features electric-over-hydraulic technology this has allowed for exciting new features. V-Trim is a selectable drive control that allows the operator to independently control the RPM of the engine and the full potential drive speed of the traction unit. The brand-new digital display shows real-time operational data, including a slope gauge.

Built on the same robust chassis as the trusted Ventrac 4520 tractor and retaining all its core benefits - what you've come to expect from a Ventrac will remain the same. This tractor is powerful, yet agile, designed for tough jobs while delivering the same reliability Ventrac is known for. Whether you're tackling steep slopes or precision tasks, the 45RC is engineered to handle it all.

SPECIFICATIONS	
ENGINE MANUFACTURER	KUBOTA
HORSE POWER	32.5 HP

BUILDING A BUSINESS WITH HEART AND INNOVATION

Brandon's journey into landscaping began with a leap of faith. Faced with the challenge of supporting his family when his wife needed to stay home with their children, Brandon boldly turned his "side work" into a full-time business. With two coworkers ready to join him and a deep determination to succeed, he took the biggest risk of his life. "I HAD to make it work," he recalls. From day one, his mission has been simple: deliver exceptional service and quality, treating every project as if it were for his own home.

As his business grew, so did the challenges. That's where Ventrac equipment came in, transforming how Brandon and his team approached their work. "It's drastically lessened the amount of back-breaking labor," he says, describing how the equipment allows them to move materials efficiently without damaging customers' lawns. Whether installing a new yard, redoing a gravel driveway, or placing stone in landscape beds, Ventrac's versatility has been a game changer.

One tool that stands out in Brandon's lineup is the Power Bucket. Surprisingly underrated, it's become essential for hauling everything from mulch to boulders. Alongside other attachments like the Power Rake, AERA-Vator, Seeder, and Snow Blades, Ventrac helps Brandon tackle diverse projects with precision and ease.

For Brandon, it's not just about efficiency; it's about leaving a lasting impression. "We like to leave the job with the yard looking just like the way it was before we came in," he shares. This attention to detail and respect for his clients' properties have helped his business stand out, building trust and loyalty along the way.

Brandon's story is one of grit, heart, and innovation—proof that challenges can become opportunities with the right tools and mindset and that risks can lead to remarkable rewards.

"The overall versatility is unlike anything else out there"

- Brandon Gerber, OH Landscape Contractor

EXPANDED VERSATILITY

VENTRAC LOADER AND TOOLS

There is a world of endless possibilities with the Ventrac Loader and collection of versatile tools.

The Ventrac Loader adds **enhanced versatility** for the landscape, hardscape, site work, and tree care industries. With easy operation and effortless installation, the KM500 Loader on the Ventrac 4520 is a dream combination that maximizes the capability of the tractor while serving as a loader and material mover. When combined with a dual-wheeled tractor, it becomes the **most turf-friendly loader** in the industry, allowing you to move quickly across turf without tracking the ground.

The four interchangeable tools for the Loader add more versatility than ever before. The KM500 comes standard with a loader bucket for lifting, moving, transporting, and positioning any material it can scoop. And expanding the KM500's capabilities are the Rock Bucket with Grapple, the Log Grapple, the Light Material Bucket and Pallet Forks. This comprehensive range of equipment is designed to revolutionize a wide range of property management tasks and **conquer any challenge** with ease and precision.

PROFESSIONAL GROUNDS CARE

In the world of professional grounds care, safety, reliability, and productivity are high on the list of essential needs when choosing equipment.

For those managing large campuses, sports fields, or municipal grounds, a versatile piece of **equipment that works year-round** and handles an array of jobs can be the single most valuable piece in the fleet.

There is a lot of highly specialized equipment on the market that only does one task. Ventrac is designed to work year round as an all seasons machine of versatility, eliminating the costly need to purchase multiple dedicated machines. Engineered to do more jobs, Ventrac is the epitome of Versatility That Works, offering a full array of attachments that **produce professional results**. One tractor with various attachments

is ideal for cities, parks, sports fields, and municipal grounds management, where jobs like mowing, snow removal, aerating, sidewalk edging, stump grinding, etc., are tackled with ease.

Managing the grounds of a large campus has its challenges. Making the correct equipment choice should not be one of those challenges. Ventrac equipment increases efficiency in labor and productivity while producing professional results.

“It amazes me that I walk on different college campuses, and they’re using something else other than a Ventrac. I think to myself, ‘Wow. I just couldn’t imagine doing our job without it.’”

– Beau Mastrine
Director of Grounds, College of Wooster

VERSATILITY FOR GOLF

SAFETY. QUALITY. CAPABILITY.

These traits define the value that golf course maintenance equipment should add to any fleet. Ventrac is designed to **maximize value** and set the benchmark for these performance categories.

Ventrac maximizes these values by offering strategies for maintaining rough areas, greens, and general maintenance on golf courses.

Native rough areas are challenging and labor-intensive for many courses. These areas are often the most significant portion of a course and can be the steepest or most rugged terrain to mow.

Ventrac's FlexFrame design and features allow the tractor to easily navigate challenging terrain and provide more stability on slopes.

Ventrac's specialized attachments are engineered to perform individual tasks with **impeccable results**. Courses everywhere utilize Ventrac for mowing, stump grinding, sod cutting, trenching, snow removal, and debris removal.

The entire system is the pinnacle of machine capability, safety, and quality. Moreover, it results in definite advantages for the bottom line and where it matters the most: **on the course**.

COMPLETE LAWN INSTALL

The Ventrac lawn installation system provides operators with the perfect blend of capabilities while yielding the best results.

With each attachment, Ventrac users have every tool necessary to deal with the unique challenges of lawn installs, regardless of the situation or weather conditions. In addition, the tractor enables the best access to job sites by easily traversing rugged terrain, resulting in lawn installation that gets done faster, yields better results, and can happen on more properties with Ventrac than anything else.

4520 STANDARD FEATURES

INTERMITTENT USE DEFINED

The engine may operate between 20° and 30° for up to 10 minutes. If 10 minutes is reached, the engine must be returned to 20° or less to assure proper oil lubrication. After returning to 20° or less, the intermittent cycle can be repeated. The 4520P Kawasaki DFI engine is rated for 30° continuous operation and does not have this requirement.

ACCESSORIES

CANOPY
Provides shade for operator.
(Optional 3-Speed Fan)

HEATED SUSPENSION SEAT
Ride all day in the comfort of a well supported suspension seat.

ARM RESTS
Adds comfort and support, especially while operating on slopes.

FOOT PEDAL CONTROL
A more traditional style foot control for forward and reverse functions.

RAISED PLATFORM
Increases height of foot platform for easier reach and comfort.

DUAL WHEEL KIT
Increase stability, traction and safety on slopes up to 30°.

TOOLBOX
Provides useful storage
(Optional rear or side Toolbox)

NARROW TIRE AND CHAIN
The tire chains help improve traction and reduce wheel spin in rough/steep environments

TIRE OPTIONS
Standard: All-Terrain
Optional: Turf.

TRAILER MOVER
An excellent tool for moving a trailer into tight spaces where you cannot fit your truck.

ES220 SEED/FERTILIZER
220lb capacity

3-POINT
Add non-PTO powered implements to the rear with the Category One 3-Point Hitch.

STROBE & WORK LIGHTS
Provides increased safety for roadside operation and low-visibility situations.
(comes in two separate kits)

DIGITAL SLOPE INDICATOR
Indicates the degree of slope while tractor is in operation.

3-N-1
Mount non-PTO-powered Ventrac attachments to the rear. Also includes 2-inch receiver for towing, and brackets for additional weight

2-N-1
Allows for the option of a front 2-inch receiver hitch or front counterweights.

MID-WEIGHT BAR KIT
Add up to four additional weights to the middle of your 4000 series Ventrac

DIRECTIONAL HAZARDS
Directional LED signals/ blinking hazards.

ADDITIONAL ACCESSORIES

12V FRONT	DUAL AUXILIARY HYDRAULICS
12V REAR	FRONT HITCH LOCK VALVE
BACKUP ALARM	HYDRAULIC TOP LINK
HORN

BUILT FOR SNOW, DESIGNED FOR SIDEWALKS VENTRAC SSV

The new Ventrac SSV makes it easy and efficient to manage snow and ice on sidewalks. The SSV is a dedicated Sidewalk Snow Vehicle with an industry-first 36" working width in order to allow access to the tightest areas of any property.

The SSV allows more reduction of hand labor and walk-behind equipment than ever before. It's also designed with a full arsenal of commercial quality snow removal attachments and de-icing options that are engineered to provide a system that can handle any winter storm. The wait for a proper sidewalk snow machine is finally over.
